## Professional Summary

---

Artificial Intelligence and Data Science undergraduate with practical experience in Machine Learning, Data Analysis, Natural Language Processing, and Full Stack Web Development through internships and hands-on projects. Proficient in Python, Scikit-learn, Flask, Pandas, NumPy, and REST API development. Passionate about building intelligent, data-driven solutions and continuously learning emerging technologies. A quick learner and collaborative problem solver, currently seeking internship opportunities in AI/ML, Software Development, and Full Stack Engineering.

## Experience

---

### AI/ML Intern

Jul 2025 – Jan 2026

*Labmentix Pvt. Ltd.*

*Remote*

Performed exploratory data analysis (EDA) on datasets containing 10,000+ records using Pandas and Matplotlib to identify trends and optimize feature selection.

Developed and evaluated 5+ machine learning models using Scikit-learn for classification and regression tasks, improving prediction accuracy by approximately 12%.

Designed automated data preprocessing pipelines for handling missing values, encoding, and normalization, reducing manual data preparation efforts by nearly 30%.

Implemented model evaluation techniques including cross-validation and performance metrics such as Accuracy, Precision, Recall, and F1-Score to ensure robust model performance.

Collaborated with team members to document findings and prepare technical reports for 3+ projects and internal analysis.

### Web Development Intern

Jun 2025 – Aug 2025

*AENEXZ*

*Remote*

- Developed and tested 3+ responsive web applications using HTML, CSS, JavaScript, and Flask, improving user experience and application functionality.
- Integrated 5+ REST APIs to enable seamless communication between frontend interfaces and backend services.
- Implemented backend routing and server-side logic using Flask, reducing manual data handling efforts by approximately 30%.
- Collaborated on full-stack development and deployment workflows across multiple projects, gaining hands-on experience in end-to-end web application development.

## Projects

---

### Customer Churn Prediction | Python · Scikit-learn · Pandas · Machine Learning

- Developed a machine learning model to predict customer churn using real-world datasets and achieved improved prediction accuracy over baseline models.

### AI Chatbot Using NLP | Python · NLP · Flask · REST API

- Built an NLP-based chatbot with text preprocessing, tokenization, and intent recognition techniques.

### Data Analysis and Visualization | Python · Pandas · NumPy · Matplotlib

- Performed exploratory data analysis on real-world datasets to identify trends, patterns, and actionable insights.

## Education

---

### Vivekananda Global University, Jaipur

Aug 2024 – Present

*B.Tech in Artificial Intelligence & Data Science*

### Chandigarh University

Jul 2023 – Jun 2024

*B.E. in Computer Science Engineering*

*First Year Completed*

## Technical Skills

---

**Languages:** Python, JavaScript, SQL

**AI/ML:** Scikit-learn, Pandas, NumPy, NLP, Data Preprocessing, Feature Engineering, Model Evaluation, LLMs, Prompt Engineering, RAG

**Web & Tools:** HTML, CSS, JavaScript, Flask, REST APIs, Git, GitHub, VS Code, Jupyter Notebook, MS Excel
